Re Item V

Reference is made to the following documents:

- D1: EP-A-0 384 540 (SHELL INTERNATIONALE RESEARCH MAATSCHAPPIJ B.V) 29 August 1990 (1990-08-29)
- D2: US-A-6 069 289 (DANDEKAR ET AL) 30 May 2000 (2000-05-30)
- D3: US-B1-6 281 406 (CAIN JOHN J) 28 August 2001 (2001-08-28)

The present application is directed to a method for separating mono-branched hydrocarbons e.g. from a mixture of hydrocarbons comprising bringing said mixture into contact with at least one adsorbent, thereby allowing the selective adsorption of said mono-branched hydrocarbons by said adsorbent, and desorbing said mono-branched hydrocarbons from said adsorbent, thereby allowing to selectively separate said mono-branched hydrocarbons.

D1 and D2 are considered to represent the closest prior art (cf. passages indicated in the ISR) and disclose the separation of hexane, 3-methylpentane and 2,3-dimethylbutane (D1) and 2,2-dimethylbutane, 2,3-dimethylbutane, 2-methylpentane and hexane (D2) using zeolitic adsorption materials.

Thus, the matter of claims 1-10 12-15 and 17-22 is not novel in view of D1 and D2. The matter of claims 23 is disclosed in D3 (cf. passages indicated in the ISR) and, therefore, the matter of claims 23 is also not novel in the light of D3.

However, the use of the special zeolite MCM-22 (claim 11) in a method for separating mono-branched hydrocarbons as well as the special ratio (claim 16) mono-branched/linear alkanes = 1/1 is not disclosed in the prior art.

However, the matter of claim 16 does not show any technical effect on which an inventive step can be based.
